# CLARA for IT Teams

You've got a solid tech stack, We're not here to mess with it.  
Smart tech teams skip the build and let recruiters move faster—with less risk.

## **CLARA is not another system to maintain.**

It's a lightweight, secure AI layer that helps HR surface qualified candidates—without adding work to your team or disrupting your roadmap.

## **What CLARA is (and isn't):**

### **CLARA is:**

- ✓ A human-in-the-loop AI screening layer
- ✓ Built to sit on top of your ATS (Lever, Greenhouse, Workday, SmartRecruiters, etc.)
- ✓ Fast to deploy—30 minutes or less
- ✓ Designed for use by TA & HR teams
- ✓ Cost efficient, value-add

### **CLARA is not:**

- ✗ A replacement for your ATS
- ✗ A black box automation tool
- ✗ A 6-month implementation project
- ✗ Something your team needs to build, host or support
- ✗ A data compliance or security risk

## **Why IT teams like CLARA:**

- No engineering support required
- Secure by design—strong data protection practices
- No disruption to your roadmap
- Plays well with others—works with tools you already support

## **Why leadership teams like CLARA:**

- 80% faster screening time
- Up to 50% lower hiring costs
- 26% better-qualified candidates surfaced

## **Let recruiters move faster. You stay focused.**

Want to take a look? We're happy to show you how it works.
